2005 Publications, by Category and Page Number

The index appears in three parts. The first, which begins below, lists publications by major category, and within categories, by page number. In order, the categories are Original Articles, Concise Communications, Editorials, SHEA Position Papers, Special Reports, Review, the Section Topics in Long-Term Care, and Letters to the Editor. Items published in Medical News are not indexed.

This comprehensive list is followed by the Author Index (page 934) and the Subject Index (page 941). Each entry in these two indices points to a major category and page number in the comprehensive list below, where the complete citation may be found.—Ed.
